Site is a Sonar/water interface located on an ocean,  
involving a relatively complex set of structures, to some extent  
joined, involved with maritime, perhaps naval traffic & highly  
suggestive of a <sup>major</sup> harbor area. A foreign, ~~possibly~~ Continental feel is  
involved with the site.

<sup>Summary</sup>  
 Crumbling walls or ruins are part of the site, and  
 manifest a long, complex history of religion & political  
 change, heritage, & conflict. Shipping, trade, colonial expansion  
 & cultural development are important components. Spain  
 appears to be closely connected with the site, or vice versa.

CEUTA  
(thā-ōō-tā)

A fortified city in North Africa is a territory of Spain. The city occupies an enclave of 7.5 square miles on the coastline of Morocco, at the Mediterranean entrance to the Strait of Gibraltar, Ceuta is the closest African Port to Europe.

The city stands on a narrow peninsula that runs East-West and is dominated by Mt. Acho (636 ft). Mt. Acho is probably ancient Mt. Abila (Abyla) which according to tradition constituted with Gibraltar the classical "Pillars of Hercules". Ceuta's arabic name is Sabta, probably derived from the name of the roman colony on the peninsula. Ad Septem Fratres (Seven Brothers) so called from the seven hills rising there in a group.

Little remains of the old part of the city on the western side of the peninsula. The modern town lies to the east on the slopes of Almina, Shipping is the major industry followed by fishing and food processing. Ceuta is also important as a military station and a refueling port for ships.
